

Spot AI: The modern AI Camera System

Transform your organization with the most user-friendly and powerful AI Camera System on the market — all without needing to rip and replace your system.

What makes Spot AI different?

Power of the Edge

- Plug-and-play: auto-connect to any IP camera. Use your existing cameras or get Spot AI cameras for free.
- 24/7 continuous, local recording
- Powerful AI on high-resolution video

Convenience of the Cloud

- Scale to infinite locations, users, cameras
- Infinite cloud backup for saved clips
- Automatic software updates

On one dashboard, from anywhere

- Built-in Zero Trust security for secure access and use
- Robust Role Based Access Control with AD + SAML tie-ins
- Full video delivery and network observability

Benefits

AI-assisted workflows

Advanced, coachable AI assistant to streamline every workflow.

Open platform

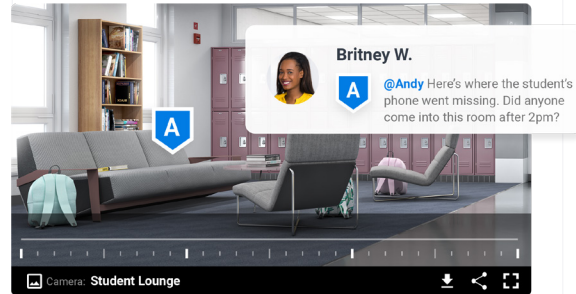

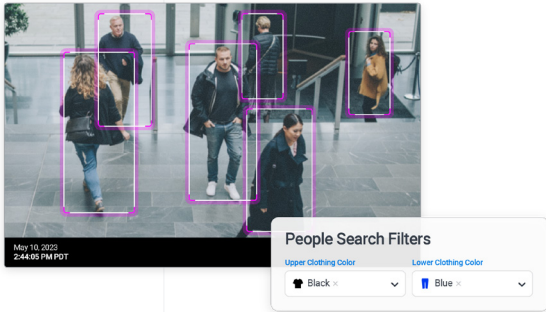

Works with any camera via RTSP stream, any network and any user. No need to rip and replace.

Secure architecture

Built-in firewall, SOC 2 Type 2 Compliant, and Zero Trust security — by design.

Key features and capabilities

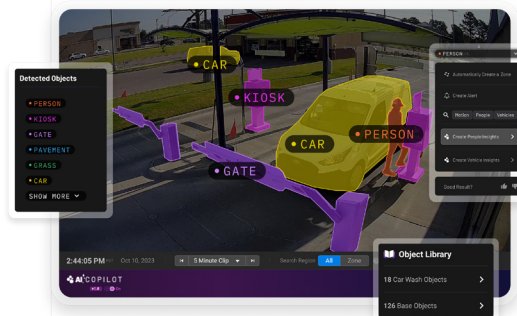

Accelerated search

Save time with AI-enabled search.

- People and Vehicle Attribute Search
- Face Recognition
- License Plate Search

Easy collaboration tools

Share and collaborate on footage using custom Cases to resolve incidents quickly.

Automate security and operations

Be both reactive *and* proactive with analytics, reporting, and alerts.

- Intelligence dashboards
- Real-time alerts

AI assistant

Accelerate and streamline every workflow with AI Copilot: your AI assistant for cameras.
